

**“Thank you for recommending the Sioo Wood Protection product to us,**

which I have applied to the peripheral decking of our home in Scotland.

To elaborate, our home is situated high in the Galloway Forest and is exposed to the best and worst of the Scottish weather.

I have tried many products to provide effective protection without success. Having applied Sioo as recommended, I am very pleased with the result.

Sioo is very easy to apply, it has a lovely natural finish and it leaves the decking surface smooth and clean and very good to walk on, giving a firm grip even in wet conditions.

I regard this as a good investment with just the one application required and a low follow on maintenance over a long lifespan.

Many thanks again, I would indeed recommend Sioo over any other product on the market today!”
